1 **NOTICE OF MOTION FOR ATTORNEYS’ FEES AND REIMBURSEMENT AWARDS**

2 PLEASE TAKE NOTICE that on August 1, 2019, at 2:00 p.m., Co-Lead Counsel Lief  
3 Cabraser Heimann & Bernstein, LLP and Saxena White P.A. will move the Court, before the  
4 Honorable Jon S. Tigar, for an order (1) granting their request for attorneys’ fees; and (2) granting  
5 \$25,000 Reimbursement Awards each to Co-Lead Plaintiffs Fire & Police Pension Association of  
6 Colorado (“FPPA”) and The City of Birmingham Retirement and Relief System (“Birmingham”).

7 This motion is supported by the (1) accompanying brief; (2) Supplemental Joint  
8 Declaration of Richard M. Heimann and Joseph E. White, III (“Supp. Joint Decl.”); (3)  
9 Declaration of Sean A. Petterson Regarding Settlement Notice; (4) Declarations of Richard M.  
10 Heimann of Lief Cabraser (“Lief Cabraser Decl.”), Joseph E. White, III of Saxena White  
11 (“Saxena White Decl.”), Daniella Quitt of Glancy Prongay & Murray LLP (“Glancy Decl.”),  
12 Shane P. Sanders of Robbins Arroyo LLP (“Robbins Arroyo Decl.”), and Bruce E. Jameson of  
13 Prickett, Jones & Elliott, P.A. (“Prickett Jones Decl.”), and exhibits; (5) Declaration of Daniel B.  
14 Rehns of Hach Rose Schirripa & Cheverie LLP (“Hach Rose Decl.”), and exhibits; (6)  
15 Declarations of Brian T. Fitzpatrick and Jeffrey N. Gordon; (7) Declarations of Kevin B. Lindahl  
16 of FPPA and James D. Love of Birmingham; (8) previously filed Declarations of Hon. Daniel  
17 Weinstein (Ret.) (Dkt. 270-3) and Michael A. Santoro (Dkt. 270-4); and (9) other previous filings  
18 and orders in this case. Pursuant to Local Rule 7-2(c), a proposed order granting this motion will  
19 be submitted with Co-Lead Counsel’s reply on July 25, 2019, after the deadline for objections.

20 **STATEMENT OF ISSUES TO BE DECIDED**

21 1. Whether the Court should approve as reasonable the Parties’ negotiated attorneys’  
22 fee award of \$68 million to be divided among Plaintiffs’ Counsel.<sup>1</sup>

23 2. Whether the Court should grant each of the Co-Lead Plaintiffs \$25,000, to be paid  
24 from Co-Lead Counsel’s fees, as Reimbursement Awards for their efforts in pursuing claims on  
25 Wells Fargo’s behalf and helping achieve this Settlement.

26 \_\_\_\_\_  
27 <sup>1</sup> Capitalized terms generally retain their meanings from the Settlement Stipulation, except that  
28 for purposes of this motion, “Plaintiffs’ Counsel” refers to Co-Lead Counsel, Glancy, Robbins  
Arroyo, and Prickett Jones, and “Defendants” refers collectively to the individuals referenced in  
the Stipulation as the Officer Defendants and the Director Defendants.

1 **MEMORANDUM OF POINTS AND AUTHORITIES**

2 **PRELIMINARY STATEMENT**

3 For more than 2 ½ years, Co-Lead Plaintiffs and Plaintiffs’ Counsel vigorously prosecuted  
4 this derivative action for the benefit of Wells Fargo and its shareholders. These extensive  
5 litigation efforts culminated in a Settlement that includes a monetary payment of \$240 million as  
6 well as valuable corporate governance reforms (“Reforms”) and compensation forfeitures and  
7 reductions (“Clawbacks”), which the Parties value at \$80 million, for a total Settlement value of  
8 \$320 million. Co-Lead Counsel now petition this Court for an award of attorneys’ fees of \$68  
9 million and approval of Reimbursement Awards for Co-Lead Plaintiffs. All of the considerations  
10 courts typically evaluate in assessing fees support this request.

11 Of primary importance, Plaintiffs’ Counsel have achieved an exceptional recovery for  
12 Wells Fargo. The \$240 million cash component alone far surpasses any other insurance-funded  
13 resolution of a shareholder derivative action and reflects a percentage of Wells Fargo’s estimated  
14 damages that is, even under the most-conservative scenario, more than double the typical  
15 recovery in comparably sized securities class cases. Additionally, the Reforms and Clawbacks  
16 provide meaningful, continuing benefits to Wells Fargo and its shareholders, for which the  
17 Company attributes \$80 million to this case.

18 Plaintiffs’ Counsel achieved these results in the face of considerable risks, chief among  
19 them the challenge of prevailing at trial on notoriously difficult director oversight, or *Caremark*,  
20 claims under Delaware law. Equally uncertain was Plaintiffs’ ability to establish that Wells Fargo  
21 suffered damages tied to Defendants’ breaches of fiduciary duty or violations of federal securities  
22 laws. Those challenges were compounded by the serious risk that favorable rulings by this Court  
23 could be undermined, due to collateral estoppel principles, by adverse dispositive rulings in  
24 related derivative actions also brought on Wells Fargo’s behalf. Indeed, that risk *materialized*  
25 shortly after this Court’s ruling that Plaintiffs sufficiently pleaded demand futility, when the court  
26 presiding over the California State Derivative Action held the plaintiffs there did not. Given the  
27 potentially preclusive impact of that ruling, and the possibility of similar decisions in related  
28 derivative cases in Delaware, Co-Lead Counsel moved to intervene, stay, or dismiss those cases.

1 While Co-Lead Counsel’s efforts in the California and Delaware proceedings—which spanned  
2 more than 14 months—ultimately led to the resolution of those claims, in the meantime the  
3 existential threat posed by those cases subjected Plaintiffs’ Counsel to the very real prospect of  
4 non-recovery.

5 Further, Plaintiffs’ Counsel expended significant resources in litigating and attempting to  
6 resolve Wells Fargo’s claims, with no guarantee of compensation. After investigating claims  
7 against Defendants and filing a detailed consolidated amended complaint, Co-Lead Counsel  
8 overcame two rounds of motions to dismiss; conducted voluminous document discovery in  
9 anticipation of more than 40 depositions, summary judgment motions, and trial; protected Wells  
10 Fargo’s claims against collateral attack; and engaged in an extended, arm’s-length mediation  
11 process before the Honorable Daniel Weinstein (Ret.) and Jed Melnick, Esq., including seven  
12 mediation sessions as well as numerous submissions and presentations on liability and damages.  
13 In all, Plaintiffs’ Counsel devoted more than \$22.4 million on a contingency basis, in addition to  
14 more than \$1 million in costs for which they do not seek reimbursement, and will devote  
15 additional uncompensated time in finalizing this Settlement, including ensuring final judgments  
16 are entered in the related derivative actions and addressing inquiries from Wells Fargo  
17 shareholders. Respectfully, their willingness to take on that risk should be rewarded, and the fee  
18 percentage they request is at or below the range even a sophisticated entity like Wells Fargo could  
19 be expected to pay for an individually negotiated contingent representation.

20 Indeed, Wells Fargo *did* negotiate the fee here. After the Parties came to agreement on  
21 the other terms of the Settlement, they engaged in separate negotiations—overseen by the  
22 Mediators—resulting in the Parties’ agreement that Co-Lead Counsel would seek up to \$68  
23 million in fees. That agreement should be accorded significant weight, particularly as the fee  
24 comes entirely from Wells Fargo and does not, as in a class case, detract from others’ recovery.

25 The fee request is also reasonable under Ninth Circuit jurisprudence and when compared  
26 to awards in similarly sized settlements. A \$68 million award represents 21.25% of the \$320  
27 million total Settlement value, below the Ninth Circuit’s 25% “benchmark.” And even were the  
28 Court to decline to adopt *any value* for the Reforms and Clawbacks—contrary to the opinions of

1 Plaintiffs’ corporate governance experts, Professors Jeffrey Gordon and Michael Santoro—\$68  
2 million would represent 28.33% of the Settlement’s \$240 million cash component. As Professor  
3 Brian Fitzpatrick opines, based on his widely cited study of attorneys’ fees in other cases as well  
4 as his analysis of this litigation and Settlement, that modest upward adjustment from the 25%  
5 benchmark would be well justified.

6 The requested fee’s reasonableness is further confirmed by a “lodestar cross-check.” That  
7 exercise illustrates the effectiveness of Co-Lead Counsel’s pursuit of Wells Fargo’s claims and  
8 their attention to further protecting the Company’s interests by streamlining discovery, avoiding  
9 duplication of efforts among counsel, and negotiating the simultaneous resolution of all derivative  
10 litigation based on the Improper Sales Practices. Co-Lead Counsel were, in fact, *conservative* in  
11 safeguarding against overbilling: among other things, they ceased substantive casework upon  
12 reaching an agreement in principle to settle, more than two months before the Stipulation was  
13 executed. And the 3.03 lodestar multiplier corresponding to the \$68 million fee falls well within  
14 the presumptively acceptable range in this Circuit.

15 Finally, Co-Lead Counsel’s request for \$25,000 Reimbursement Awards to each of the  
16 Co-Lead Plaintiffs is reasonable given their extraordinary service to Wells Fargo, which helped  
17 achieve this historic Settlement. FPPA’s and Birmingham’s representatives closely participated  
18 in every aspect of this case, collectively devoting more than 400 hours of time they otherwise  
19 would have spent on other work for those institutions. Unlike in a class case, moreover, these  
20 awards will not lessen other shareholders’ recovery, but rather come from *Co-Lead Counsel’s fee*,  
21 and they represent a miniscule percentage of even just the \$240 million cash recovery. As with  
22 Plaintiffs’ Counsel’s requested fee, these awards are warranted and should be approved.

## 23 ARGUMENT

### 24 **I. PLAINTIFFS’ FEE REQUEST IS REASONABLE**

#### 25 **A. Each of the Factors Relevant to the Fee Analysis Supports the Requested Fee.**

26 Because the benefit achieved “is easily quantified in common-fund settlements,” courts  
27 can “award attorneys a percentage of the common fund in lieu of the often more time-consuming  
28 task of calculating the lodestar.” *In re Bluetooth Headset Prods. Liab. Litig.*, 654 F.3d 935, 942

1 (9th Cir. 2011).<sup>2</sup> The Ninth Circuit instructs that “[t]wenty-five percent is the benchmark that  
 2 district courts should award in common fund cases.” *In re Pac. Enters. Sec. Litig.*, 47 F.3d 373,  
 3 379 (9th Cir. 1995). Courts typically adjust the 25% base award up or down depending on:

4 the extent to which class counsel achieved exceptional results for  
 5 the class, whether the case was risky for class counsel, whether  
 6 counsel’s performance generated benefits beyond the cash . . . fund,  
 7 the market rate for the particular field of law (in some  
 8 circumstances), the burdens class counsel experienced while  
 9 litigating the case (e.g., cost, duration, foregoing other work), and  
 10 whether the case was handled on a contingency basis.

11 *Hefler v. Wells Fargo & Co.*, 2018 WL 6619983, at \*12-13 (N.D. Cal. Dec. 18, 2018) (Tigar, J.)  
 12 (ellipsis in original).<sup>3</sup> These factors strongly support a \$68 million award to Plaintiffs’ Counsel.<sup>4</sup>

13 **1. Plaintiffs’ Counsel have achieved an exceptional result for Wells Fargo  
 14 and its shareholders.**

15 “The first and ‘most critical factor [in determining an attorneys’ fee] is the degree of  
 16 success obtained.” *Hefler*, 2018 WL 6619983, at \*13 (alteration in original). This Court has  
 17 recognized “the law appropriately provides for some upward adjustment [from the 25%  
 18 benchmark] where the results achieved are significantly better than the norm.” *Rodman v.*  
 19 *Safeway, Inc.*, 2018 WL 4030558, at \*3 n.3 (N.D. Cal. Aug. 22, 2018). The numbers here speak  
 20 for themselves: the \$240 million monetary component alone is the largest-ever insurer-funded  
 21 cash derivative recovery by more than \$100 million (PA Mot. at 16-17), as well as the second-  
 22 largest overall cash derivative recovery, and represents (1) 48% of the \$500 million in D&O

23 <sup>2</sup> Unless otherwise indicated, all emphasis in this brief has been added, and all internal citations  
 24 and quotation marks have been omitted.

25 <sup>3</sup> Because Plaintiffs’ claims arise under the federal securities laws and Delaware law, both federal  
 26 common law and Delaware principles apply to the fee analysis. *See Vizcaino v. Microsoft Corp.*,  
 27 290 F.3d 1043, 1047 (9th Cir. 2002) (“Because Washington law governed the claim, it also  
 28 governs the award of fees.”). In any event, “Delaware and federal law are in accord on the issue  
 of derivative counsel fees.” *In re Oracle Sec. Litig.*, 852 F. Supp. 1437, 1445 (N.D. Cal. 1994).

<sup>4</sup> Co-Lead Counsel were assisted in connection with this case, under limited circumstances, by  
 Glancy, Robbins Arroyo, and Prickett Jones. *See* Prelim. Approval Mot. (“PA Mot.”) (Dkt. 270)  
 23 n.28. Additionally, as part of the Settlement, Co-Lead Counsel have agreed to allocate 5% of  
 the awarded fee to a group of additional law firms (identified in the Stipulation, at ¶ V(37)) that  
 pursued derivative claims in Delaware Chancery Court that are also being released under the  
 Settlement (collectively, “Delaware Derivative Counsel”). While the Hach Rose Declaration  
 summarizes (at ¶¶ 8-29 & Exs. 1-2) the time and work Delaware Derivative Counsel devoted to  
 their cases, only time billed by Co-Lead Counsel, Glancy, Robbins Arroyo, and Prickett Jones is  
 being submitted for purposes of calculating the lodestar for this fee application.

1 insurance available to satisfy a judgment; (2) 21.8% of the estimated \$1.1 billion in out-of-pocket  
2 costs Plaintiffs assert Wells Fargo incurred due to the Improper Sales Practices; and (3) 9.6% of  
3 the low-end estimate (\$2.5 billion), and 6.9% of the high-end estimate (\$3.5 billion), of total  
4 damages including the Company's actual and anticipated lost income, which are more difficult to  
5 quantify. *See* Supp. Prelim. Approval Br. (Dkt. 272) at 3; Prelim. Approval Order ("PA Order")  
6 (Dkt. 274) at 11 (noting "the particular difficulties of establishing the larger category of lost  
7 income damages").<sup>5</sup> Further, the \$320 million total Settlement value represents between 9.1%  
8 and 29.1% of Wells Fargo's estimated damages. The percentage recovery is exceptional by any  
9 of these measures, particularly considering that fewer than 10 derivative actions in history have  
10 settled for over \$100 million. *See* Final Approval Br. at 22 n.9.

11 The Settlement is also extraordinary in comparison to securities class actions. According  
12 to one study, for example, the median percentage recovery in securities class cases from 1996 to  
13 2018 involving investor losses between \$1 billion and \$4.999 billion was 1.2%,<sup>6</sup> and another  
14 study found the median recovery achieved in settlements from 2009 to 2017 in securities class  
15 cases of over \$1 billion in "simplified tiered damages" was 2.7%, and was 2.0% in 2018.<sup>7</sup> Thus,  
16 measured as a percentage of Wells Fargo's total estimated damages, the Settlement is at minimum  
17 more than double, and potentially *many times greater* than, the median percentage recovery in  
18 comparable securities class cases.

19 Even treating Wells Fargo's recovery as \$240 million less Plaintiffs' Counsel's \$68  
20 million fee (*see* PA Order at 11) would result in \$172 million, representing 15.6% of the  
21 estimated out-of-pocket damages and 4.9% of the highest estimate of total potential damages.

22 <sup>5</sup> While the Court has noted it "does not have a clear picture of the Individual Defendants'  
23 financial resources," which "would also be available to pay a potential judgment" (PA Order at  
24 10 n.6), even assuming they could contribute \$500 million to a judgment—surely an inflated  
25 number—the \$240 million cash recovery would represent 24% of the amount Plaintiffs  
26 potentially could recover at trial given the insurance limit.

27 <sup>7</sup> Cornerstone Research, *Securities Class Action Settlements, 2018 Review and Analysis*, at 6  
28 (2019), available at [https://www.cornerstone.com/Publications/Reports/Securities-Class-Action-  
Settlements-2018-Review-and-Analysis](https://www.cornerstone.com/Publications/Reports/Securities-Class-Action-Settlements-2018-Review-and-Analysis).

1 Under that analysis, Wells Fargo would recover as much as *13 times more* in monetary relief than  
2 the median recovery rate in similarly sized securities class cases. Co-Lead Counsel have, in short,  
3 achieved a recovery far beyond the norm, and should be compensated accordingly. *See, e.g., In*  
4 *re Omnivision Techs., Inc.*, 559 F. Supp. 2d 1036, 1046 (N.D. Cal. 2008) (\$13.75 million  
5 recovery of “approximately 9% of the possible damages,” which was “more than triple the  
6 average recovery in securities class action settlements,” constituted “a substantial achievement on  
7 behalf of the class” and “weigh[ed] in favor of granting the requested 28% fee”).

8 **2. Plaintiffs’ Counsel faced serious substantive and procedural risks.**

9 “The risk that further litigation might result in Plaintiffs not recovering at all, particularly  
10 a case involving complicated legal issues, is a significant factor in the award of fees.” *Id.* at  
11 1046-47. Reflecting the Ninth Circuit’s observation that “derivative lawsuits are rarely  
12 successful,” *Pac. Enters.*, 47 F.3d at 378, Plaintiffs’ Counsel confronted significant hurdles to  
13 obtaining any recovery.

14 Co-Lead Counsel first had to surpass *two* rounds of motions to dismiss. Most critically, to  
15 satisfy the exacting standard for pleading demand futility, Plaintiffs needed to allege with  
16 particularity “that the directors *knew* they were not discharging their fiduciary obligations or that  
17 the directors demonstrated a *conscious* disregard for their responsibilities.” *Shaev v. Baker*, 2017  
18 WL 1735573, at \*9 (N.D. Cal. May 4, 2017) (“*Wells Fargo I*”) (emphasis in original). Those  
19 claims rest on “possibly the most difficult theory in corporation law upon which a plaintiff might  
20 hope to win a judgment,” *In re Caremark Int’l Inc. Derivative Litig.*, 698 A.2d 959, 967 (Del. Ch.  
21 1996), especially given that Wells Fargo’s charter “exculpates its Directors from liability unless  
22 the directors breached their duty of loyalty or the conduct involved bad faith, intentional  
23 misconduct, or a knowing violation of the law.” *Wells Fargo I*, 2017 WL 1735573, at \*10.

24 Co-Lead Counsel’s early success by no means guaranteed the same result later in the  
25 litigation. Defendants would have challenged demand futility again (as well as other aspects of  
26 Plaintiffs’ claims) at summary judgment. *See Pirelli Armstrong Tire Corp. Retiree Med. Benefits*  
27 *Trust v. Stumpf*, 2012 WL 12920191, at \*1 & n.1 (N.D. Cal. May 17, 2012) (“disagree[ing]” with  
28 plaintiff’s contention “that the individual defendants cannot relitigate the issue of demand futility

1 on summary judgment”). At trial, the factfinder would—unlike at the pleading stage—weigh the  
2 evidence for and against liability, as well as whether demand on the Board would have been  
3 futile. *See Omnivision*, 559 F. Supp. 2d at 1047 (observing that in the previous five years, “only  
4 two securities class action lawsuits in this district ha[d] resulted in verdicts, both of which were  
5 for defendants,” and that “[n]ationwide, Plaintiffs ha[d] won only three of eleven such cases to  
6 reach verdicts since 1996”); *In re Oclaro, Inc. Derivative Litig.*, 2014 WL 4684993, at \*2 (N.D.  
7 Cal. Sept. 19, 2014) (the “significant difficulty” in demonstrating demand futility “would arise in  
8 both motion practice and at trial,” and “[t]he powerful presumption created by the business  
9 judgment rule would pose an additional hurdle to the derivative plaintiffs’ fiduciary duty claim”).

10 Among other things, Defendants would point to Wells Fargo’s purported efforts to address  
11 the Improper Sales Practices during the Relevant Period, including (1) establishing working  
12 groups, as well as engaging third-party consultants, to identify, analyze, and rectify sales practices  
13 violations; (2) conducting town hall meetings with employees to encourage the reporting of sales-  
14 related misconduct; and (3) encouraging reporting of the progress of sales practice remediation  
15 initiatives. While Plaintiffs would have argued those actions were illusory and inadequate based  
16 on facts developed in discovery, there was a palpable risk the jury could find the evidence failed  
17 to demonstrate Defendants’ knowledge or conscious disregard of wrongdoing.

18 Plaintiffs’ Counsel also faced “the inherent uncertainties of trying securities fraud cases  
19 and the demanding pleading standards of the PSLRA,” which applied to Plaintiffs’ federal  
20 securities claims. *Hefler*, 2018 WL 6619983, at \*13. Those risks were magnified by the  
21 peculiarities of a company asserting securities claims against its senior executives, who, in typical  
22 securities cases, are the conduits through which *the company itself* is subject to liability. The  
23 extraordinary nature of those derivative claims is borne out in divisions in the caselaw regarding,  
24 for example, the company’s ability to demonstrate reliance on statements by its own officers. *See*  
25 *Wells Fargo I*, 2017 WL 1735573, at \*17-18 (noting issue but holding Plaintiffs sufficiently  
26 pleaded reliance). While Plaintiffs maintain they had the better of those arguments, a factfinder  
27 might ultimately have determined the evidence did not support their allegations.

28

1 Even if a jury found Defendants liable, establishing a causal connection between their  
2 violations of law and damages to Wells Fargo posed a serious challenge. Defendants would  
3 attempt to demonstrate a lack of proximate causation with respect to out-of-pocket damages based  
4 on regulatory fines, penalties, and other payments by the Company, claiming those costs related  
5 to alleged misconduct before the Relevant Period, resulted from actions distinct from the  
6 Improper Sales Practices, or constituted unrecoverable “business” expenses. Defendants would  
7 further argue Wells Fargo did not in fact suffer any lost business or reputational harm—which, in  
8 any event, are difficult to quantify—as evidenced by the Company’s increasing levels of reported  
9 profitability following the revelation of the Improper Sales Practices. They would also point to  
10 general market fluctuations, the independent conduct of Wells Fargo employees, or unrelated  
11 allegations of misconduct at the Company as alternative or superseding causes of the asserted  
12 damages. Establishing damages thus would have likely turned on a “battle of the experts,” an  
13 inherently risky proposition. *See Omnivision*, 559 F. Supp. 2d at 1047 (noting “[t]he parties’  
14 estimates of possible damages varied dramatically, such that if Plaintiffs prevailed on liability but  
15 Defendants prevailed on damages, the reward could have been even smaller”).

16 And, even if Plaintiffs overcame the numerous hurdles to establishing liability and  
17 damages, a favorable verdict “would almost certainly have had to be defended on appeal.”  
18 *Hefler*, 2018 WL 6619983, at \*13. Given the uncertainty of victory and the *certainty* of delay in  
19 attempting to secure it, Plaintiffs’ Counsel should be rewarded for achieving this excellent  
20 recovery for Wells Fargo without subjecting it to the cost of years of additional litigation.

21 Finally, because plaintiffs in related derivative actions “share an identity of interest in  
22 seeking to prosecute claims by and in the right of . . . the corporation,” *Cal. State Teachers’ Ret.*  
23 *Sys. v. Alvarez*, 179 A.3d 824, 847 (Del. 2018), a dispositive ruling adverse to plaintiffs in the  
24 California State Derivative Action or the Delaware Derivative Actions could have precluded Co-  
25 Lead Plaintiffs from pursuing Wells Fargo’s claims in this case—notwithstanding this Court’s  
26 favorable (but not final) rulings at the pleading stage. *See id.* at 855 (derivative plaintiffs in  
27 Delaware Chancery proceedings were collaterally estopped from continuing with their case due to  
28 adverse demand futility ruling in related federal derivative action). Indeed, that risk *materialized*

1 less than a week after this Court’s decision on demand futility, when the court overseeing the  
2 California State Derivative Action held plaintiffs there failed to sufficiently allege demand futility  
3 (though it allowed leave to amend). Given the potentially preclusive impact of a final adverse  
4 judgment in those proceedings, Co-Lead Plaintiffs moved to intervene in and stay the case, which  
5 the state court ultimately granted. *See* Supp. Joint Decl. ¶¶ 55-63. The risk of collateral attack  
6 persisted, however, given the pendency of the Delaware Derivative Actions. To protect Wells  
7 Fargo’s interests, Co-Lead Counsel moved expeditiously to intervene and stay those cases,  
8 ultimately achieving complete stays or voluntary dismissals. *Id.* ¶¶ 73-85. In all, Co-Lead  
9 Counsel’s efforts with respect to the California and Delaware state cases spanned more than 14  
10 months and required at least 13 briefs on behalf of Co-Lead Plaintiffs, as well as Co-Lead  
11 Counsel’s participation in at least 17 hearings. *Id.* ¶ 51. Co-Lead Counsel also achieved the  
12 consolidation or secured the dismissal of, or otherwise immunized this case from the potential  
13 negative effects of, tag-along derivative actions filed in this District. *Id.* ¶¶ 38-49. Faced with  
14 those procedural challenges, along with the hurdles to obtaining and preserving a favorable  
15 verdict, Plaintiffs’ Counsel achieved a high-value Settlement, which also affords Wells Fargo  
16 global peace with respect to derivative claims based on the Improper Sales Practices. *See* Stip.  
17 ¶ V(26). The requested fee is commensurate with those efforts and results.

18 **3. Plaintiffs’ Counsel devoted more than \$22 million on a contingency**  
19 **basis for more than 2 ½ years.**

20 Plaintiffs’ Counsel’s fee should “take into account the risk of representing . . . Plaintiffs  
21 on a contingency basis over a period of [2 ½] years.” *Bennett v. SimplexGrinnell LP*, 2015 WL  
22 12932332, at \*6 (N.D. Cal. Sept. 3, 2015) (Tigar, J.). Attorneys’ stakes in contingency cases also  
23 do not exist in a vacuum, but rather comprise “a portfolio of risk,” such that “the winning cases  
24 finance not only their own costs, but the costs of the losing cases as well.” *Willner v. Manpower*  
25 *Inc.*, 2015 WL 3863625, at \*6 (N.D. Cal. June 22, 2015) (Tigar, J.) (quoting Elizabeth Chamblee  
26 Burch, *Financiers As Monitors in Aggregate Litigation*, 87 N.Y.U. L. REV. 1273, 1290 (2012)).  
27 These considerations support a \$68 million award.  
28

1 Co-Lead Counsel (and other Plaintiffs' Counsel working under their direction) devoted  
2 more than 48,000 hours to (1) thoroughly investigating the relevant claims; (2) filing a 189-page  
3 consolidated complaint with an "abundance of particularized allegations," *Wells Fargo I*, 2017  
4 WL 1735573, at \*15; (3) defeating two rounds of motions to dismiss; (4) securing Wells Fargo's  
5 claims against the risk of collateral attack based on the related state court cases; (5) consolidating  
6 and coordinating related federal actions with this case; (6) obtaining and processing over 3.5  
7 million pages of documents produced by Defendants, Wells Fargo, and third-parties, more than  
8 1.1 million pages of which were reviewed and analyzed at the time the Parties reached an  
9 agreement in principle to settle this case; (7) reviewing tens of thousands of pages of documents  
10 from other civil and regulatory proceedings, public reports, press coverage, and congressional  
11 testimony related to the Improper Sales Practices; (8) researching and preparing for as many as 40  
12 anticipated depositions; (9) consulting with experts regarding liability and damages; and  
13 (10) negotiating this Settlement. Supp. Joint Decl. ¶¶ 22-35; 38-86; 92-94; 97-134; 135-55.  
14 Throughout the litigation and mediation process, Plaintiffs' Counsel faced defense counsel at the  
15 top of their profession from highly respected firms. *See DeStefano v. Zynga, Inc.*, 2016 WL  
16 537946, at \*17 (N.D. Cal. Feb. 11, 2016) ("The quality of opposing counsel is also relevant to the  
17 quality and skill that class counsel provided."). And while "the two-plus year lifespan of this  
18 litigation is not as lengthy as some other cases," Plaintiffs' Counsel "bore a heavy financial  
19 burden in expending substantial resources—a claimed lodestar of over \$[22] million—on a  
20 contingency basis," *Hefler*, 2018 WL 6619983, at \*13. That is in addition to the more than \$1  
21 million in costs Plaintiffs' Counsel have incurred, for which they do not seek reimbursement, as  
22 well as further (uncompensated) time Co-Lead Counsel will devote to continuing to correspond  
23 with Wells Fargo shareholders and helping effectuate the dismissal of the California State  
24 Derivative Action and the Delaware Derivative Actions, without which this Settlement will not  
25 become final. *See* Stip. ¶¶ V(40-42). Plaintiffs' Counsel's requested compensation is appropriate.

1                   **4. That the fee was specifically negotiated by the Parties strongly**  
2                   **supports its reasonableness.**

3                   That Co-Lead Counsel’s proposed fee “is the product of arm’s-length negotiation between  
4                   counsel highly experienced in shareholder derivative actions and agreed upon only after the other  
5                   terms of the Settlement were negotiated” supports its reasonableness. *In re Rambus Inc.*

6                   *Derivative Litig.*, 2009 WL 166689, at \*4 (N.D. Cal. Jan. 20, 2009); *see also* Stip. ¶ V(44).

7                   Significantly, those negotiations were overseen by the Mediators, with Judge Weinstein attesting  
8                   that the requested fee “is fair and reasonable in light of the substantial benefit conferred upon  
9                   Wells Fargo and the effort expended by Co-Lead Counsel in achieving it.” Weinstein Decl. ¶ 19.

10                  Those negotiations bear even further relevance than they might in a securities class  
11                  settlement, as Plaintiffs’ Counsel’s fee comes directly from *Wells Fargo*, not from the recoveries  
12                  of absent class members. Wells Fargo has determined the amount it is willing to pay for  
13                  Plaintiffs’ Counsel’s services, which merits strong consideration. *See In re Atmel Corp.*  
14                  *Derivative Litig.*, 2010 WL 9525643, at \*13 (N.D. Cal. Mar. 31, 2010) (“The parties first agreed  
15                  on a gross settlement of \$9.65 million and the implementation of the new corporate governance  
16                  rules, and only then did they allocate the attorneys’ fees. A court should refrain from substituting  
17                  its own value for a properly bargained-for agreement.”).<sup>8</sup> Further, as Professor Fitzpatrick  
18                  observes, “it is well known that standard contingency-fee percentages in individual litigation are  
19                  at least 33%,” and even sophisticated clients like Wells Fargo might pay at least 28%. Fitzpatrick  
20                  Decl. ¶ 30 (emphasis in original) (citing, *inter alia*, David L. Schwartz, *The Rise of Contingent*  
21                  *Fee Representation in Patent Litigation*, 64 ALA. L. REV. 335, 360 (2012)). The fee negotiated  
22                  here is consistent with, or even more favorable than, those typical arrangements.

23                  Additionally, as of May 21, 2019, Wells Fargo and Co-Lead Counsel disseminated notice  
24                  in accordance with the PA Order. Petterson Decl. ¶ 5. The approval of Wells Fargo

25                  <sup>8</sup> This Court and others have cited *Atmel* (*see, e.g.*, PA Order at 11) notwithstanding the  
26                  decision’s notation that it is “not designated for publication and may not be cited.” 2010 WL  
27                  9525643, at n.1. Regardless of *Atmel*’s precedential value, Co-Lead Counsel submit its reasoning  
28                  is persuasive here. *See also Ill. Union Ins. Co. v. Intuitive Surgical, Inc.*, 188 F. Supp. 3d 978,  
                  984 & n.7 (N.D. Cal. 2016) (Tigar, J.) (“agree[ing] with [the] conclusion” of decision designated  
                  as uncitable, “as applied to the facts [of the case at bar],” and further noting Court was “not  
                  relying on [the decision] for its precedential value” and Court’s ruling did not turn on that  
                  decision).

1 shareholders, including Co-Lead Plaintiffs and other “institutional investors who presumably had  
2 the means, the motive, and the sophistication to raise objections,” weighs “in favor of approval”  
3 of the fee. *Hefler*, 2018 WL 6619983, at \*15.<sup>9</sup>

4 **5. A \$68 million fee appropriately accounts for the non-monetary**  
5 **benefits Co-Lead Counsel helped secure.**

6 Plaintiffs’ Counsel’s fee should also reflect Wells Fargo’s attribution of \$80 million to this  
7 case for the Reforms and Clawbacks, given the case’s “significant” role in achieving those  
8 benefits. *See* Stip. Ex. A at 4, 8; Stip. Ex. B at 4. But the fee request is nonetheless reasonable  
9 even if the Court declines to assign a specific valuation to the Reforms and Clawbacks or  
10 determine precisely how much credit Co-Lead Counsel deserve for them.

11 *First*, the record strongly supports assigning \$80 million in value to the Reforms and  
12 Clawbacks, for a total Settlement value of \$320 million. This valuation resulted from extensive  
13 negotiations between sophisticated parties, aided by the Mediators, which should be credited.  
14 *See, e.g.*, Stip. at 9; Weinstein Decl. ¶ 12 (“The mediator’s proposal placed a combined value of  
15 \$80 million on the non-monetary Corporate Governance Reforms and Clawbacks.”); *Klein v.*  
16 *Gordon*, 2019 WL 1751839, at \*2 (C.D. Cal. Feb. 12, 2019) (noting with approval “the settlement  
17 agreement . . . acknowledges that [the] derivative action contributed, at least in part, to the initial  
18 corporate reforms adopted by Opus which are aimed at preventing future misconduct”).

19 There can be little question regarding the \$60 million Wells Fargo attributes to this case  
20 from the Clawbacks (out of a total \$122.5 million), Stip. Ex. B at 4, which are readily  
21 quantifiable. Additionally, corporate governance experts Jeffrey Gordon and Michael Santoro  
22 attest to the Reforms’ value. Indeed, Professor Gordon opines “[t]his may be the rare settlement  
23 of derivative litigation in which the value of the governance reforms exceeds even a substantial  
24 out-of-pocket recovery.” Gordon Decl. ¶ 20. He classifies the creation of a Conduct  
25 Management Office (“CMO”) as “[a]mong the most important Reforms.” *Id.* ¶ 29. In particular,  
26 locating the CMO outside the line businesses that are subject to its monitoring “is an important  
27 element in creating a credible compliance structure,” as it protects against the pressure

28 <sup>9</sup> Shareholders have until July 11, 2019 to file objections, and Co-Lead Counsel will respond by July 25, 2019 to any objections.

1 compliance employees otherwise might feel “to be ‘team players.’” *Id.*; *see also* Santoro Decl.  
2 ¶¶ 20-21 (enhancing the Risk Committee’s oversight responsibilities and creating the CMO  
3 “introduc[e] a previously nonexistent locus of responsibility and means of exercising managerial  
4 control over risk and compliance issues”).

5 Professor Gordon also highlights “the reshaping of several board committees that will  
6 result in much deeper board oversight of ‘compliance’ as a distinct category of business issues  
7 and much deeper board oversight of business conduct and culture that is often the source of  
8 compliance problems.” Gordon Decl. ¶ 33. He notes the establishment of the “Compliance”  
9 subcommittee of the Risk Committee, amendment of the Risk Committee’s charter to include  
10 oversight of the “risk” components of the Company’s culture, and expansion of the Human  
11 Resources Committee’s responsibilities to include training in ethics and business conduct as well  
12 as the interaction of incentive compensation and risk management—issues “at the heart of the  
13 Improper Sales Practices.” *Id.* And separating the roles of CEO and Board Chairman “may be a  
14 critical element in assuring that compliance failures are squarely and promptly addressed by the  
15 Board,” given that “[t]he high-powered stock-based compensation incentives of a CEO may lead  
16 him/her to downplay compliance problems with strategies that generate outsize returns,” whereas  
17 “the reputation-focused perspective of a separate chair is likely to lead to a quicker focus on  
18 compliance questions as they emerge.” *Id.* ¶ 32; *see also* Santoro Decl. ¶ 27.

19 Additionally, Professor Santoro explains prohibiting directors from serving on more than  
20 three other boards “gives due recognition to the level of time, effort and attention required to be  
21 an effective fiduciary of such a large and complex company as Wells Fargo.” Santoro Decl. ¶ 29.  
22 Engaging former SEC Chair Mary Jo White to facilitate the Board’s annual evaluation process,  
23 moreover, “provides a layer of assurance for shareholders, employees, customers, and the public  
24 that complacency will not settle in over the reconstituted Board.” *Id.* ¶ 40. He further opines that  
25 ending product sales goals in Wells Fargo’s retail banking business, implementing new controls  
26 to help ensure new accounts have been authorized, and launching a new compensation plan in the  
27 Company’s Retail Bank (as well as raising the minimum hourly wage for U.S.-based employees  
28

1 and enhancing benefits) “appropriately and adequately address the compensation incentives that  
2 contributed to the Improper Sales Practices. *Id.* ¶¶ 49-50.

3 Professor Santoro concludes the Reforms “are sufficient to prevent the recurrence of the  
4 Improper Sales Practices or similar misconduct in the Company’s Community Bank sector” and  
5 “provide value in helping restore confidence and trust in the Company which in turn could have a  
6 substantial impact on its current economic performance and long-term sustainability.” *Id.* ¶ 53.  
7 He accordingly opines that the \$20 million value the Parties ascribe to the Reforms “is eminently  
8 reasonable.” *Id.* ¶ 54. Professor Gordon likewise concludes “that the Reforms will deliver  
9 substantial value for Wells Fargo and its shareholders and that Co-Lead Plaintiffs’ efforts in  
10 promoting these reforms have thus created substantial value for Wells Fargo and its shareholders,”  
11 and therefore, “the \$20 million attributed to Co-Lead Plaintiffs in the Proposed Settlement is well  
12 within the range of value-creation-in-fact, perhaps even at the low end.” Gordon Decl. ¶ 38.  
13 Indeed, attempting to quantify the Reforms “understates the[ir] importance,” given the  
14 “existential” threat Wells Fargo could face in the event of “a recurrence of a major compliance  
15 failure.” *Id.* ¶ 24. These experts’ opinions regarding the value of the Reforms should be  
16 accorded substantial weight. *See, e.g., Atmel*, 2010 WL 9525643, at \*11 (crediting declaration by  
17 Professor Gordon, who “opine[d] that the value of [the corporate reforms] is ‘significant’ because  
18 they prevent a ‘recurrence of the particular governance failures that led to the need for the  
19 restatement’ and ‘improve corporate governance in a way that will promote long term shareholder  
20 value’”) (second alteration in original).

21 *Second*, the record strongly supports finding the Reforms and Clawbacks were at least “a  
22 proximate result of th[is] derivative lawsuit[.]” *Oclaro*, 2014 WL 4684993, at \*4. As Professor  
23 Fitzpatrick observes, Wells Fargo’s acknowledgment that facts alleged in this case were  
24 “significant factors” in implementing the Reforms and Clawbacks (Stip. Ex. A at 4, Stip. Ex. B at  
25 4) “can only decrease Wells Fargo’s take from this settlement by increasing plaintiffs’ counsel’s  
26 fee percentage.” Fitzpatrick Decl. ¶ 28. Accordingly, “unlike the class action situation where a  
27 defendant might be indifferent to what the fee percentage is and feel free to make all sorts of  
28 statements to facilitate settlement,” Professor Fitzpatrick “put[s] more credence in Wells Fargo’s

1 concession in a derivative action as it comes with a substantial financial price.” *Id.* Additionally,  
2 Wells Fargo stipulates that “[p]rior to [its] implementation of several of the[] . . . [R]eforms, the  
3 Parties engaged in mediation efforts during which Co-Lead Plaintiffs proposed a resolution of this  
4 matter that included proposals of certain of these corporate governance reforms.” Stip. Ex. A at  
5 8; *see also* Weinstein Decl. ¶ 12. Wells Fargo’s representations are a far cry from “hearsay  
6 testimony” in an “attorney declaration,” as in *Oclaro*, 2014 WL 4684993, at \*4; *see also Atmel*,  
7 2010 WL 9525643, at \*11 (noting reforms “were all adopted after the [] derivative actions were  
8 filed” and Atmel made “representations . . . in the record that the filing of the actions and later  
9 settlement negotiations were material factors in the implementation of the measures”).

10 This Court’s statement that “[o]ther causative factors such as the [regulatory]  
11 investigation[s], the class action and public scrutiny” may have contributed to Wells Fargo’s  
12 implementation of the Reforms and Clawbacks,” PA Order at 10 (alterations in original) (quoting  
13 *Oracle*, 852 F. Supp. at 1447), is not inconsistent with the Parties’ agreement that “significant”—  
14 not *sole*—credit belongs to Co-Lead Counsel. And the cases cited in the PA Order bear little, if  
15 any, resemblance to this one. The corporate reforms in *Oclaro*, for example, were “exceedingly  
16 modest,” including one that “require[d] the board to *continue* to comply with NASDAQ’s  
17 requirements regarding the board’s independence” and another that plaintiffs failed to show was  
18 “likely to prevent the kind of alleged wrongdoing in th[at] case.” 2014 WL 4684993, at \*2, \*3  
19 (emphasis in original). The reforms, which resulted from “a one-day mediation and several  
20 follow-up discussions,” also did not “provide the relief prayed for in the complaint or moot any of  
21 the claims.” *Id.* at \*4, \*5. Additionally, “an actively-litigated Securities Class Action led the  
22 derivative actions, which were stayed for years,” rendering it “far more likely that, if anything,  
23 the voluntary reforms were proximately caused by the actively litigated Securities Class Action  
24 rather than the stayed Federal [derivative] Action.” *Id.* at \*4. In *Oracle*, moreover, Judge Walker  
25 criticized the “fecklessly prosecuted derivative action,” which rendered other causative factors  
26 “considerably more compelling.” 852 F. Supp. at 1447.

27 In stark contrast to those cases, Wells Fargo implemented these important Reforms and  
28 Clawbacks while this consolidated action was in the throes of litigation. *See* Stip. Ex. A at 4-8.

1 These measures resulted, moreover, from months of intensive negotiations, including seven  
2 mediation sessions. *See* Supp. Joint Decl. ¶¶ 135-55. Certain of the Reforms also reflect the  
3 express relief sought in Plaintiffs’ consolidated complaint, which requested (in addition to  
4 monetary relief) that the judgment direct Wells Fargo to, among other things, allow for a vote on  
5 proposals to strengthen (1) “Board oversight and supervision of Wells Fargo’s Community  
6 Banking sales practices,” (2) the Company’s “disclosure controls to ensure material information  
7 is adequately and timely disclosed to the SEC and the public,” and (3) “the Board’s supervision of  
8 operations.” Consol. Compl. (Dkt. 83) at 180-81. Additionally, unlike the derivative action in  
9 *Oclaro*, this case has been actively litigated since the fall of 2016 and has largely set the pace for,  
10 not lagged behind, the securities class case. *See, e.g., Hefler v. Wells Fargo & Co.*, 2018 WL  
11 1070116, at \*1 (N.D. Cal. Feb. 27, 2018) (“refer[ring] to the Derivative Litigation Order when  
12 that order sets forth the Court’s reasoning as to a particular claim or argument [in the securities  
13 class case]”). There is no indication in the record that the class case contributed in any way to the  
14 non-monetary benefits achieved here. Nor could the California State Derivative Action—which  
15 never proceeded past the pleading stage, having been dismissed twice on demand futility grounds  
16 and then stayed—receive credit for these Reforms or Clawbacks (as opposed to any reforms or  
17 clawbacks specific to that case).

18 Finally, the requested \$68 million fee is reasonable even if the Court concludes it cannot  
19 reliably estimate the dollar value of the Reforms and Clawbacks or determine how much credit to  
20 assign Co-Lead Counsel for them. Regardless of their precise value, these measures “are  
21 designed to prevent future improper[] [sales practices] as well as other acts of corporate  
22 misbehavior,” and “at the very least, potential buyers of [Wells Fargo] stock likely will view such  
23 reforms as an additional reason to purchase the stock.” *Atmel*, 2010 WL 9525643, at \*12; *see*  
24 *also* Gordon Decl. ¶¶ 36-37. And given Wells Fargo’s market capitalization of more than \$200  
25 billion,<sup>10</sup> even determining the Reforms and Clawbacks afford only a very small benefit to the  
26 Company would support Co-Lead Counsel’s fee request. In *In re Activision Blizzard, Inc.*

27 *Stockholder Litigation*, for example, the Delaware Chancery Court reasoned an “award of \$5-10

28 <sup>10</sup> *See* <https://finance.yahoo.com/quote/WFC/>, last visited on June 27, 2019.

1 million”—included in a total \$72.5 million award out of the \$275 million cash recovery—could  
 2 be justified for “a valuable non-monetary benefit” to the corporation “with a market capitalization  
 3 in excess of \$15 billion.” 124 A.3d 1025, 1071 (Del. Ch. 2015). Here, even if the Court were to  
 4 consider the cash and non-monetary components separately, assigning a benchmark 25% (or \$60  
 5 million) fee award with respect to the \$240 million cash recovery and an \$8 million award for  
 6 non-monetary benefits achieved for one of the world’s largest banks is reasonable.

7 Indeed, if the Court assumes the Reforms and Clawbacks provide just \$32 million in value  
 8 to Wells Fargo—40% of the value the Parties assign to them—a \$68 million fee would represent  
 9 25% of the resulting \$272 million total value of the Settlement. *See Bennett*, 2015 WL 12932332,  
 10 at \*6 (applying a “conservative [valuation] assumption” of \$1 million for prospective relief whose  
 11 monetary value was “difficult to determine,” and noting the total requested fee award was “less  
 12 than one-third of the total recovery”); *Willner*, 2015 WL 3863625, at \*7 (awarding 30% fee  
 13 where “the parties ha[d] not provided sufficient information from which the Court could place a  
 14 specific value on [the policy change],” noting “if the policy change were valued at . . . about 13%  
 15 of Plaintiff’s counsel’s estimate . . . then a fee award of \$2,625,000.00 would represent 25% of  
 16 the total actual and constructive relief obtained by counsel”). “[S]cientific precision is not  
 17 required when awarding fees,” and the Court “has substantial discretion in the methods it uses  
 18 and the evidence it relies upon.” *In re Compellent Techs., Inc. S’holders Litig.*, 2011 WL  
 19 6382523, at \*21 (Del. Ch. Dec. 9, 2011); *see also Rodman*, 2018 WL 4030558, at \*6 (in  
 20 determining reasonable fee, Court “seeks to do rough justice”). In short, whether the Court  
 21 includes the Reforms and Clawbacks to value the Settlement at \$320 million or simply adjusts the  
 22 25% benchmark upward to account for them, “it is important to reward counsel in *some* way for  
 23 pursuing the non-cash relief.” Fitzpatrick Decl. ¶ 16 (emphasis in original).

24 **6. Co-Lead Counsel’s fee request is firmly in line with awards from**  
 25 **comparable securities class settlements.**

26 The Ninth Circuit instructs that fund size is merely “one relevant circumstance to which  
 27 courts must refer,” and has *not* endorsed a rule that fee awards should automatically decrease as  
 28 the fund amount increases. *Vizcaino*, 290 F.3d at 1047; *see also* Fitzpatrick Decl. ¶ 22 (“The

1 practice among some district courts to decrease fee percentages as settlement sizes increase has  
 2 been criticized by scholars and other courts, and, in my opinion, this court should not follow it.”).  
 3 In any event, “the fact that average and median fee percentages are lower in larger cases does not  
 4 mean, of course, that courts do not award higher fee percentages when the facts and  
 5 circumstances justify it.” Fitzpatrick Decl. ¶ 24.<sup>11</sup> Awarding \$68 million, which represents *at*  
 6 *most* 28.33% of the Settlement’s value, is well justified here.

7 In performing this analysis, the Court has looked to empirical studies, while noting their  
 8 data “does not replace the 25 percent benchmark” but rather “is simply an important additional  
 9 data point in the determination of an appropriate award.” *Rodman*, 2018 WL 4030558, at \*5. In  
 10 one comprehensive study, Professor Fitzpatrick analyzed 688 reported and unreported federal  
 11 class action settlements between 2006 and 2007. *See* Brian T. Fitzpatrick, *An Empirical Study of*  
 12 *Class Action Settlements and Their Fee Awards*, 7 J. EMPIRICAL LEGAL STUD. 811, 817 (2010)  
 13 (“Fitzpatrick Study”). The Fitzpatrick Study shows that for settlements of between \$250 million  
 14 and \$500 million, the mean and median fee percentages were 17.8% and 19.5%, respectively,  
 15 with a standard deviation of 7.9%. *Id.* at 839 (tbl. 11). Another widely cited study similarly  
 16 found the average fee percentage for settlements in 2009-2013 of greater than \$67.5 million was  
 17 22.3%. *See* Theodore Eisenberg, Geoffrey P. Miller, & Roy Germano, *Attorneys’ Fees in Class*  
 18 *Actions: 2009-2013*, 92 N.Y.U. L. REV. 937, 948 (2017) (“Eisenberg & Miller 2017 Study”). An  
 19 award reflecting 21.25% of the \$320 million Settlement value would thus fall below the average  
 20 fee percentage recorded for comparably sized settlements in the Eisenberg & Miller 2017 Study

21 <sup>11</sup> *See also, e.g., In re TFT-LCD (Flat Panel) Antitrust Litig.*, 2013 WL 1365900, at \*7 (N.D. Cal.  
 22 Apr. 3, 2013) (awarding 28.5% of \$1.1 billion); *In re Checking Account Overdraft Litig.*, 830 F.  
 23 Supp. 2d 1330, 1367 (S.D. Fla. 2011) (awarding 30% of approximately \$410 million); *In re*  
 24 *Converse Tech., Inc. Sec. Litig.*, 2010 WL 2653354, at \*5 (E.D.N.Y. June 24, 2010) (awarding  
 25 25% of \$225 million settlement in case that involved, *inter alia*, “uncertainty of key issues  
 26 relating to liability and damages” and lead counsel “engaged in lengthy, contentious settlement  
 27 and mediation sessions over the course of [ ] eighteen months,” resulting in “the second largest  
 28 securities class action settlement involving options backdating claims”); *In re Initial Pub.*  
*Offering Sec. Litig.*, 671 F. Supp. 2d 467, 515 (S.D.N.Y. 2009) (one-third of \$510 million); *In re*  
*Adelphia Commc’ns Corp. Sec. & Derivative Litig.*, 2006 WL 3378705, at \*3 (S.D.N.Y. Nov. 16,  
 2006) (awarding 2.89 multiplier, corresponding to 21.4% of \$455 million settlement); *Allapattah*  
*Servs., Inc. v. Exxon Corp.*, 454 F. Supp. 2d 1185, 1240 (S.D. Fla. 2006) (31.33% of \$1.038  
 billion); *In re Linerboard Antitrust Litig.*, 2004 WL 1221350, at \*17 (E.D. Pa. June 2, 2004) (30%  
 of approximately \$202.6 million); *In re Vitamins Antitrust Litig.*, 2001 WL 34312839, at \*10  
 (D.D.C. July 16, 2001) (34.06% of \$359.4 million).

1 and within one standard deviation of the most-relevant mean and median percentages in the  
2 Fitzpatrick Study.

3 Even measuring the \$68 million fee based solely on the \$240 million cash component  
4 yields 28.33%, which is reasonable under those studies. The Fitzpatrick Study, for example,  
5 found that for settlements of between \$100 million and \$250 million, the mean and median fee  
6 percentages were 17.9% and 16.9%, respectively, with a standard deviation of 5.2%. 7 J.  
7 EMPIRICAL LEGAL STUD. at 839 (tbl. 11). As Professors Eisenberg and Miller have explained,  
8 “[f]ee requests falling within one and two standard deviations above or below the mean”—which  
9 would be the case for 28.33% here—“should be viewed as potentially reasonable but in need of  
10 affirmative justification.” Theodore Eisenberg and Geoffrey P. Miller, *Attorney Fees in Class*  
11 *Action Settlements: An Empirical Study*, 1 J. EMPIRICAL LEGAL STUD. 27, 74 (2004). Drawing on  
12 that study, Professor Fitzpatrick opines “the facts and circumstances justify an above-average fee  
13 percentage in this case—*especially* if the court is not going to add any of the value of the non-  
14 cash benefits to the denominator from which the fee is calculated.” Fitzpatrick Decl. ¶ 25  
15 (emphasis in original); *see also, e.g., Rodman*, 2018 WL 4030558, at \*6 (awarding 28% where  
16 “the exceptionally strong result obtained, the risk undertaken by counsel litigating on  
17 contingency, the complexity of the legal issues, and the duration of the litigation all weigh[ed] in  
18 favor of an upward adjustment,” and “the size of the common fund weigh[ed] in favor of a  
19 downward adjustment”).

20 **B. The Fee’s Reasonableness Is Further Confirmed by a Lodestar Cross-Check.**

21 Courts “have routinely enhanced [counsel]’s lodestar to reflect the risk of non-payment in  
22 common fund cases.” *Vizcaino*, 290 F.3d at 1051. Recognizing the lodestar method’s potential  
23 to encourage overbilling, the Ninth Circuit limits it to “a cross-check on the reasonableness of a  
24 percentage figure.” *Id.* at 1050 n.5. As this Court has observed, moreover, “when an objection is  
25 made to the use of a percentage award in a megafund case, it is usually on the ground that a flat  
26 percentage results in a *windfall* to plaintiffs’ counsel relative to their lodestar.” *In re Cathode Ray*  
27 *Tube (CRT) Antitrust Litig.*, 2016 WL 4126533, at \*2 (N.D. Cal. Aug. 3, 2016). There is no  
28 windfall here. The requested \$68 million fee would result in a blended multiplier of 3.03 of the

1 total lodestar contributed by Plaintiffs’ Counsel (\$22,426,479.50), based on 48,367.65 total  
 2 hours—well within the “presumptively acceptable range of 1.0-4.0” in this Circuit. *Dyer v. Wells*  
 3 *Fargo Bank, N.A.*, 303 F.R.D. 326, 334 (N.D. Cal. 2014) (Tigar, J.); *see also Vizcaino*, 290 F.3d  
 4 at 1051 n.6 (approving 3.65 multiplier, and citing appendix of cases showing “a range of 0.6-19.6,  
 5 with most . . . from 1.0-4.0 and a bare majority . . . in the 1.5-3.0 range”).<sup>12</sup>

6 The requested multiplier is justified by the risks Plaintiffs’ Counsel faced, the complexity  
 7 of this non-typical litigation, and the creativity and diligence they demonstrated in pursuing Wells  
 8 Fargo’s claims to this exceptional conclusion for the Company and its shareholders. *See supra* pp.  
 9 5-11, 13-18; Supp. Joint Decl. ¶¶ 160-76. Over more than 2 ½ years, Co-Lead Counsel and other  
 10 firms acting at their direction devoted more than 48,000 hours to litigating and resolving Wells  
 11 Fargo’s claims. Much of that time was spent amassing the necessary factual support to defeat two  
 12 pleading motions and prepare for trial; protecting Wells Fargo’s claims against the threat of  
 13 collateral attack; and responding to the numerous substantive challenges to Co-Lead Plaintiffs’  
 14 claims during the course of the extended mediation process that led to this Settlement. *See*  
 15 *generally* Supp. Joint Decl. ¶¶ 16-155. With respect to document discovery, Plaintiffs’ Counsel  
 16 carefully reviewed and analyzed more than 332,000 documents produced by Wells Fargo and  
 17 third-parties, totaling more than 1.1 million pages, *id.* ¶ 122, but did so efficiently. To that end,  
 18 Co-Lead Counsel implemented a streamlined process, including incorporating technology-  
 19 assisted review (“TAR”), by which documents were subjected to multiple levels of review and  
 20 coding (and re-coding as appropriate). *Id.* ¶¶ 123-27. Those documents were analyzed, moreover,  
 21 specifically in preparation for the depositions of over 40 anticipated fact witnesses, including the  
 22 20 named Defendants. *Id.* ¶ 128. Among other things, Co-Lead Counsel used information gained  
 23 through their prior analyses of documents, targeted document searches, and the TAR software to  
 24 develop detailed summaries and outlines of key issues. *Id.* ¶¶ 126-27.

25 \_\_\_\_\_  
 26 <sup>12</sup> Plaintiffs’ Counsel’s lodestar is calculated using current positions and hourly rates, “a well  
 27 established method of ensuring that “[a]ttorneys in common fund cases [are] compensated for any  
 28 delay in payment.” *Hefler*, 2018 WL 6619983, at \*14 n.17 (alterations in *Hefler*) (quoting  
*Fischel v. Equitable Life Assurance Soc’y of U.S.*, 307 F.3d 997, 1010 (9th Cir. 2002)). The  
 lodestar does not include time from Glancy, Robbins Arroyo, or Prickett Jones before January 12,  
 2017, when Lieff Cabraser and Saxena White were appointed Co-Lead Counsel.

1           Given the size and complexity of this action, Plaintiffs’ Counsel’s lodestar is reasonable,  
2 and compares favorably to other recent complex cases, including the securities class litigation in  
3 this Court based on the Improper Sales Practices. *See, e.g., Hefler*, 2018 WL 6619983, at \*13-14  
4 (approving 3.22 multiplier based on lodestar of approximately \$29.5 million over “the two-plus  
5 year lifespan of th[e] litigation”). Indeed, Plaintiffs’ Counsel’s recorded hours are *conservative*:  
6 among other things, they discontinued document review and other casework once the Parties  
7 reached an agreement in principle (not a final agreement) to settle the litigation. Supp. Joint Decl.  
8 ¶ 93. Further, virtually all of Plaintiffs’ Counsel’s lodestar reflects “at-risk time” incurred during  
9 adversarial litigation before a settlement was reached. *Cf. Hefler*, No. 16-cv-05479-JST, Dkt.  
10 240-5, at 5-6 (“ongoing diligence discovery” to follow agreement in principle) & Ex. 5.

11           Further supporting the fee request, Plaintiffs’ Counsel’s hours and rates are well  
12 documented. Each firm has submitted a declaration that includes exhibits showing (1) the hours  
13 and rates for each attorney and staff member, and a general description of his or her work on the  
14 case; (2) the hours each attorney and staff member devoted to particular categories of work during  
15 each month of the case; (3) the portion of total lodestar devoted to particular categories of work  
16 during each month of the case; (4) the hours and lodestar each attorney and staff member devoted  
17 to particular categories of work for the entirety of the case; (5) a description of the work each  
18 attorney and staff member performed for the case; and (6) biographies of each attorney and staff  
19 member. *See* Lieff Cabraser Decl. Exs. 1-6; Saxena White Decl. Exs. 1-6; Glancy Decl. Exs. 1-6;  
20 Robbins Arroyo Decl. Exs. 1-6; Prickett Jones Decl. Exs. 1-6. These submissions are consistent  
21 with those provided in connection with other recent fee applications to this Court. *See, e.g.,*  
22 *Hefler*, 2018 WL 6619983, at \*14 (noting plaintiffs’ counsel “documented in detail the amount of  
23 hours spent on different tasks per month”).

24           Finally, Plaintiffs’ Counsel’s hourly rates reflect “prevailing [rates] in the community for  
25 similar services by lawyers of reasonably comparable skill, expertise and reputation,” *Blum v.*  
26 *Stenson*, 465 U.S. 886, 895 n.11 (1984)—i.e., the Northern District of California. *See Rodman*,  
27 2018 WL 4030558, at \*6 (“[t]he relevant community is typically the forum”). The rates in this  
28 case range from \$560 to \$1,075 for partners/of counsel; \$250 to \$660 for associates/counsel; \$365

1 to \$420 for staff/project attorneys; \$295 to \$415 for “contract”/“discovery” attorneys (i.e.,  
 2 attorneys who are not full-time firm employees but rather were hired through an outside agency);  
 3 and \$180 to \$495 for paralegals, clerks, investigators, and other support staff. These rates are  
 4 comparable to those found reasonable by this Court and others in this District. *See, e.g., Hefler*,  
 5 2018 WL 6619983, at \*14 (approving rates “rang[ing] from \$650 to \$1,250 for partners or senior  
 6 counsel, from \$400 to \$650 for associates, and from \$245 to \$350 for paralegals”); *In re*  
 7 *Volkswagen “Clean Diesel” Mktg., Sales Practices, & Prods. Liab. Litig.*, 2017 WL 1047834, at  
 8 \*5 (N.D. Cal. Mar. 17, 2017) (approving rates “ranging from \$275 to \$1600 for partners, \$150 to  
 9 \$790 for associates, and \$80 to \$490 for paralegals”); *In re Chrysler-Dodge-Jeep Ecodiesel Mktg.*,  
 10 *Sales Practices, & Prods. Liab. Litig.*, No. 17-md-02777-EMC (N.D. Cal.), Dkt. 538-1 ¶¶ 26-27  
 11 (declaration showing staff attorney and contract attorney rates ranging from \$290 to \$470), Dkt.  
 12 561 (approving fee request). And the blended hourly rate for all attorneys and other firm  
 13 personnel is \$463.67, a reasonable figure for work by sophisticated counsel in the San Francisco  
 14 area. *See, e.g., Volkswagen*, 2017 WL 1047834, at \*5 (approving blended hourly rate of \$529).<sup>13</sup>

## 15 **II. THE REQUESTED REIMBURSEMENT AWARDS FOR CO-LEAD PLAINTIFFS** 16 **ARE WELL SUPPORTED AND REASONABLE**

17 The Ninth Circuit has long recognized the propriety of awards “intended to compensate  
 18 class representatives for work done on behalf of the class, to make up for financial or reputational

19 <sup>13</sup> In *CRT*, this Court addressed an objector’s argument that class counsel “used contract attorneys  
 20 to prosecute the case, and paid them at contract attorney rates, but assigned much higher hourly  
 21 rates to those lawyers for purposes of calculating Class Counsel’s lodestar.” 2016 WL 4126533,  
 22 at \*8. The special master there “reviewed the evidence in support of this objection and concluded  
 23 that there was ‘not the slightest justification to downgrade [contract attorneys’] billing rates or not  
 24 apply a multiplier to them.’” *Id.* (quoting special master’s report and recommendation). While  
 25 noting “[t]he courts have not spoken with one voice concerning the proper treatment of contract  
 26 attorney costs in the calculation of a lodestar,” the Court concluded it “need not weigh in on this  
 27 conflict, . . . because even if the Court were to reduce the Plaintiffs’ lodestar to reflect the contract  
 28 attorneys’ lower billing rates, the multiplier that would result would still be well within an  
 acceptable range.” *Id.* at \*8, \*9. Co-Lead Counsel submit that the correct approach, as “[m]any  
 courts hold”—is that “contract attorneys’ hours should be billed at market rates and included in  
 the lodestar.” *Id.* at \*8 (citing cases); *but cf. In re Anthem, Inc. Data Breach Litig.*, 2018 WL  
 3960068, at \*18, \*20 (N.D. Cal. Aug. 17, 2018) (noting “courts routinely reject claims that  
 contract attorneys should be billed at the rate paid by the law firms,” but adopting \$240 hourly  
 rate for all contract and staff attorneys). As in *CRT*, the Court need not resolve the issue here,  
 because even if all contract attorney time in this case (including time billed by current staff  
 attorneys while they were contract attorneys) were billed at the \$40-\$50 hourly rates Plaintiffs’  
 Counsel actually paid for them, the resulting lodestar would be \$19,017,696.50, and the multiplier  
 would be 3.58, still within the presumptively acceptable range in this Circuit.

1 risk undertaken in bringing the action, and, sometimes, to recognize their willingness to act as a  
2 private attorney general.” *Rodriguez v. W. Publ’g Co.*, 563 F.3d 948, 958-59 (9th Cir. 2009). In  
3 addition to furthering the public policy of encouraging investors to protect corporations’ interests,  
4 the Reimbursement Awards requested here aim to compensate Co-Lead Plaintiffs for the  
5 extraordinary, and quantifiable, time and effort they devoted to this litigation and its resolution.

6 Co-Lead Plaintiffs closely monitored and actively participated in all stages of this case,  
7 including (1) reviewing and commenting on the consolidated amended complaint and numerous  
8 other significant filings; (2) conferring with Co-Lead Counsel about, and attending, three motion  
9 and case-management hearings (in addition to the lead-plaintiff hearing), including travel  
10 between Denver/Birmingham and San Francisco; (3) conferring with counsel about Rule 26(a)(1)  
11 disclosures as well as potentially relevant documents and data to be provided by FPPA and  
12 Birmingham; (4) coordinating with Co-Lead Counsel regarding, among other things, discovery  
13 disputes, document productions, case scheduling, and strategy with respect to intervening in and  
14 staying related derivative actions; (5) overseeing the extensive settlement negotiations, including  
15 participating in all seven mediation sessions; and (6) securing approval of the Settlement by  
16 FPPA’s and Birmingham’s respective boards. FPPA Decl. ¶ 5; Birmingham Decl. ¶ 5. Further,  
17 FPPA’s and Birmingham’s representatives attest that the time they devoted to this case was time  
18 they otherwise would have devoted to other work, which “represents a direct cost to” those  
19 institutions. FPPA Decl. ¶ 7; Birmingham Decl. ¶ 7. Multiplying the approximate hours each  
20 representative spent on this case by rates commensurate with their respective salaries and benefits  
21 (i.e., an approximated \$150 hourly rate) exceeds \$25,000 each for FPPA and Birmingham. FPPA  
22 Decl. ¶ 7; Birmingham Decl. ¶ 7. Accordingly, as Professor Fitzpatrick notes, these awards will  
23 not confer a “windfall” on Co-Lead Plaintiffs. Fitzpatrick Decl. ¶ 43.

24 While this Court has referenced “the presumptively reasonable amount of \$5,000” for  
25 awards in this Circuit (PA Order at 12), Co-Lead Plaintiffs’ contributions were exceptional, as is  
26 the Settlement they helped achieve. The requested awards are commensurate with those efforts  
27 and results, and “are in line with awards in other ‘megafund’ cases.” *In re High-Tech Emp.*  
28 *Antitrust Litig.*, 2015 WL 5158730, at \*18 (N.D. Cal. Sept. 2, 2015) (awarding \$120,000 to one

1 class representative and \$80,000 each to four others in connection with \$415 million settlement);  
2 *see also In re Lithium Ion Batteries Antitrust Litig.*, 2018 WL 3064391, at \*2 (N.D. Cal. May 16,  
3 2018) (awarding certain class representatives \$30,000 each in connection with \$139.3 million  
4 settlement). The \$50,000 total award represents, moreover, 0.021% of even just the \$240 million  
5 cash recovery, below the mean and median percentages (both 0.024%) of incentive awards in  
6 securities class cases analyzed by Professors Eisenberg and Miller. Theodore Eisenberg and  
7 Geoffrey P. Miller, *Incentive Awards to Class Action Plaintiffs: An Empirical Study*, 53 UCLA L.  
8 REV. 1303, 1339 (tbl. 7) (2006); *see also CRT*, 2016 WL 4126533, at \*12 (approving \$450,000 in  
9 total awards, which represented “0.07% of the settlement fund”).

10 Additionally, unlike in a class case, these awards do not detract from class members’  
11 recovery, but rather from *Co-Lead Counsel’s fee*. They accordingly “need not be subject to  
12 intensive scrutiny, as the interests of the corporation, the public, and the defendants are not  
13 directly affected.” *In re OSI Sys., Inc. Derivative Litig.*, 2017 WL 5642304, at \*5 (C.D. Cal. May  
14 2, 2017); *see also In re Cendant Corp., Derivative Action Litig.*, 232 F. Supp. 2d 327, 344 (D.N.J.  
15 2002) (awarding \$25,000 where derivative plaintiff “performed a public service” by  
16 “represent[ing] Cendant and its shareholders,” and the proposed payment “w[ould] come from  
17 Derivative Plaintiff’s counsel’s attorneys’ fees”). The awards likewise raise no concern regarding  
18 “the proportionality between the incentive payment and the range of class members’ settlement  
19 awards.” *Dyer*, 303 F.R.D. at 335; *cf. also Smith v. Am. Greetings Corp.*, 2016 WL 362395, at  
20 \*10-11 (N.D. Cal. Jan. 29, 2016) (Tigar, J.) (granting \$5,000, rather than \$7,500, awards where  
21 the latter would amount “to roughly 4.7 times” the projected average class participant’s recovery  
22 and named plaintiffs estimated they devoted 20 and 20-25 hours, respectively, to the case);  
23 *Willner*, 2015 WL 3863625, at \*9 (awarding \$7,500 rather than \$11,000 where, *inter alia*, “the  
24 expected average settlement payment to each class member [wa]s approximately \$605.02, while  
25 the maximum award wa[s] expected to be approximately \$4,105.33”). They should be approved.

### 26 CONCLUSION

27 Co-Lead Counsel’s request for \$68 million in fees should be granted, and they should be  
28 permitted to pay \$50,000 of that amount for Reimbursement Awards to Co-Lead Plaintiffs.
